This is the second Office action for application serial number 10/534,601, Power Seat Track having a Flexible Support Assembly for a Lead Screw, filed November 17, 2005. Claims 1, 2 and 6-16 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 16 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,941,494 to Garrido. The present invention reads on Garrido as follows: Garrido teaches a track assembly comprising a lower track (18), upper track (22), a rigid shaft (32), at least one nut (38), and a cage (70). The lower track is adapted to be secured to the floor of the vehicle. The upper track is adapted to be secured to the seat assembly (12). The upper track is slidably coupled with the lower track. The rigid shaft (32) has a helical thread (44) formed thereon. The rigid shaft is rotatably supported by the upper track (24). The at least one nut engages with the helical thread of the rigid shaft. The at least one nut has a threaded bore (46) and raised bumps or threads (40) disposed on opposing lateral sides thereof. The cage is secured to the lower track (22). The cage has at least one compartment (74) for supporting the at least one nut (60) therein. The cage allows relative rotational movement of the rigid shaft relative to the at least one nut for displacing the upper track relative to the lower track. The at least one compartment interacting with the raised bumps of the at least one nut thereby allowing a

predetermined amount of movement of the at least one nut within the at least one compartment for preventing binding between the rigid shaft (32) and the at least one nut (60) due to loading of the upper track relative to the lower track.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
